- Synthetic printer paper for Inkjet printers that have 420mm roll feed capability
- Ideal for A2 sized Aboard and drop banners

Product Images

Description

Waterproof printing paper 17"

Banners and A2 posters can be produced in-house by printing on these 17 inch (420mm wide) rolls of waterproof paper using pigment inkjet printers such as Epson, Canon and HP.

This opens up a whole new range of printing possibilities for affordable printing solutions. The synthetic paper has a microporous surface coating to absorb the ink and stop it running or fading in outdoor sun and rain.

Polypro Wondermedia

Tough coated polypropylene waterproof media 420mm wide for use outdoors or indoors. The economic choice for outdoor use or tear resistant indoor use from our Magic Media range. This A2 wide coated paper on a 20m roll is specially produced in small batch quantities. This means sometimes the lead-time may be a little longer than the stock 610mm wide rolls.

Self Adhesive Vinyl

Can be applied to Foam display boards and correx / twinflute boards to create outdoor signs that can last upto several months, the powerful adhesive sticks to most surfaces. Like the Wondermedia this is specially produced in small batches so lead-times may vary.

Additional Information

All 420mm roll media is supplied wound on standard 2 inch cores. Magic Media is Green Magic's specialist own brand of waterproof and other media.

These coated inkjet synthetic media are receptive for pigment inks and can be used outdoors for several months. The print will not be waterproof with dye based ink.

Please check that your printer can use the media you are selecting as we cannot accept responsibility for items ordered in error.

- All of the above are suitable for Epson Ultra Chrome Inks.
- We do not recomend for outdoor use with dye-based inkjet printers due to the tendency to fade rapidly and dye-ink not being waterproof!
- This media is not recommended for Solvent printers.

Unlike most Epson roll media, the above is tough and waterproof.
